Research Programs

1. The Learning Environment of Undergraduate Students in the Faculty of Agriculture at Kasetsart University.

2. KNOWLEDGE AND CARE TAKING AFTER SURGERY AND CHEMO THERAPY OF FARMERS WHO ARE BREAST CANCER PATIENTS. Etc.

The objectives of this research were: 1) to describe demographic characteristics of farmers who were breast cancer patients. 2) to study of knowledge and care taking after surgery and chemo for breast cancer patients. 3) to produce video media about self-management after breast surgery. 4) farmers’ the satisfaction toward videos about self-management after breast surgery. The sample was 140 farmers in Pathum Thani province who were breast cancer patients selected by purposive sampling. The questionnaires were used to collect the data. The data were analyzed and presented through percentage, frequency and mean. The result revealed that; majority of the samples were 51-63 years old, of primary education, had a monthly incomes between 5,000 - 15,000 baht and number of households were 3-4 people. The information to receive through the media about the knowledge and care taking after surgery and chemo of breast cancer. Most of the information from person media was doctors/nurses, from mass media was printing media. The sample had the high level of knowledge and care taking practices. Farmers’ the satisfaction toward videos about self-management after breast surgery had the high level.

Produce video media show that "มะเร็งเต้านม part1-YouTube" เรื่อง การบริหารร่างกายหลังการผ่าตัดมะเร็งเต้านม Health of the farmers was important.
